TECHNICAL INFORMATION

DOOR LEAF CONSTRUCTION

The door leaf consists of: a wide, painted panel and a narrow stile covered with natural or synthetic veneer. For a glazed model we use 8 mm thick, frosted, tempered glass which is a construction element of the door leaf. Painted white part has a satin smooth surface which is achieved thanks to UV painting technology. Natural veneer is protected with ecological water varnishes, hardened under UV lamp (semi-matt effect).

ACCESSORIES INCLUDED IN THE DOOR LEAF PRICE

- Two 3D hinges
- Lock with silver or glossy gold faceplate: key lock, WC lock, or cylinder lock
- Preparation for shortening, model 4.0 maximum 60 mm
- 8 mm, frosted, tempered glass

POCKET DOOR SYSTEM

COMPACT

HOW TO OPEN THE DOOR (top view)

Discreet framework for installation in a plasterboard wall gives an opportunity to have a door in interiors, where a traditional hinged door would spoil design concept or would be even impossible to install.

Pocket door system COMPACT
(tunnel' frame, metal cassette (pocket) dedicated for a wall 125 mm thick)

COMPACT,tunnel' frames are dedicated for wall thicknesses 100 mm and 150 mm.

NOTE! Porta Compact tunnel frame is dedicated to work together with Porta pockets and pockets of leading European producers. Before installing Compact tunnel frame along with a pocket not produced by PORTA, it is required to check So/Ho dimensions.

HEIGHT,220' IS AVAILABLE IN CHOSEN COLLECTIONS:

- Porta VECTOR
- Porta DESIRE
- Nature CLASSIC
- Nature LINE
- Nature VECTOR
- Villadora MODERN

NOTES:

- Dimensions tolerance according to PN: to 1 m +=1mm, above 1 m +=2mm.
- Side door panels for rebated door sets are available in natural veneer in size '40'; S_s=444, H_s=2030.
- Door frames are designed to be installed on finished floor level. For steel door frames there is a possibility to order them in lengthen option + 30 mm (to be mounted under floor level). In this case sizes H_o and Hz are enlarged by 30 mm (level -30).
- Given dimension refers to internal door leaves, both rebated and sliding
- Porta SYSTEM integrated with an upper transom. Dimensions H_o, H_p, H_z +302 mm.
- Project (BIS and Premium) requires enlarging the wall opening S_o by 30 mm and H_o by 15 mm (dimension tolerance +=10 mm/ +=5 mm)

Durability levels of Porta finishes

CHECK THE NUMBER OF STARS NEXT TO EVERY FINISH

You can find six groups in below classification of Porta finishes. Finishes were grouped considering quality, durability and resistance to external conditions. We hope that this classification will help you to make the best possible choice. You can find the information about durability level next to each product.

<div><div>★☆☆☆☆</div><div>ECONOMIC</div><div>The most advantageous combination of cost, and quality.</div></div>	<div><div>★★☆☆☆</div><div>STANDARD</div><div>Basic durability level which provides the possibility of long-term use in household.</div></div>	<div><div>★★★☆☆</div><div>STANDARD PLUS</div><div>Improved STANDARD class with enhanced parameters of resistance to abrasion and humidity.</div></div>
<div><div>★★★★☆</div><div>PREMIUM</div><div>A perfect combination of design and guaranteed high quality. Indications for use: residential buildings and offices.</div></div>	<div><div>★★★★★</div><div>PROFESSIONAL</div><div>Durability level that combines great practicality and elegance in any place where doors are directly exposed to long-term external factors. Suggested indications for use: hotels, public buildings and offices.</div></div>	<div><div>★★★★★</div><div>EXTREME</div><div>High durability level which guarantees door protection from intensive usage. Indications for use - places with heavy foot traffic, where hundreds of people pass daily.</div></div>

Especially for you, basing on European standards, we have developed a classification of finishes (durability levels). We took into account various external factors which directly affects the durability of the door surface. Durability levels depends on the resistance to the following factors which make an impact on doors and finishes in everyday use.

<div><div>ABRASION</div><div></div><div>Unavoidable during any door usage. Every day doors are exposed to lots of abrasions, caused by people walking through and opening doors inappropriately because of their hands occupied with documents or belongings</div></div>	<div><div>DAYLIGHT</div><div></div><div>The factor which changes the colour shade in long term use. We have checked all types of veneer for you. Especially their reaction to daylight during long year use. We are proud to emphasize that the finishes we chose, achieve very good results throughout the entire time of use.</div></div>
<div><div>DETERGENTS</div><div></div><div>Housekeeping, both at home and in a workplace involves the use of detergents which make an impact on surface durability.</div></div>	<div><div>HUMIDITY</div><div></div><div>Direct exposure to highly humid air influences veneer. Its resistance to this factor guarantees constancy of shape and solid surface throughout the whole time of use.</div></div>

Finishes key:
N- 'striped' wood grain
K- 'flower' wood grain

Certain veneer pattern is received thanks to proper wood selection, appropriate veneer leaf processing and its folding technique.
Striped - veneer with a consistent wood graining.
Flower (flader) - veneer with a natural, clear and patterned wood grain.

Due to the characteristic of natural veneers, differences in colour and graining, might appear on a door leaf.
These differences cannot be grounds for complaints.

WHITE COLOUR IS COMPARABLE WITH RAL

Natural veneer 'Select' - is a specially prepared and selected natural veneer characterized by high repeatability of the wood grain and colour.
Products finished with this type of veneer meet the high quality standards.

Natural veneers: Oak Ash, Walnut and Satin Oak - are characterized by a variety of colorus, graining, etc. Their properties are the result of:
natural environment of trees, climate, habitat conditions.
These morphological properties of wood, which are characteristic for a natural material, distinguish it from synthetic finishes and aren't defective in any way.
