DOOR FRAMES

INVISIBLE JOINTS

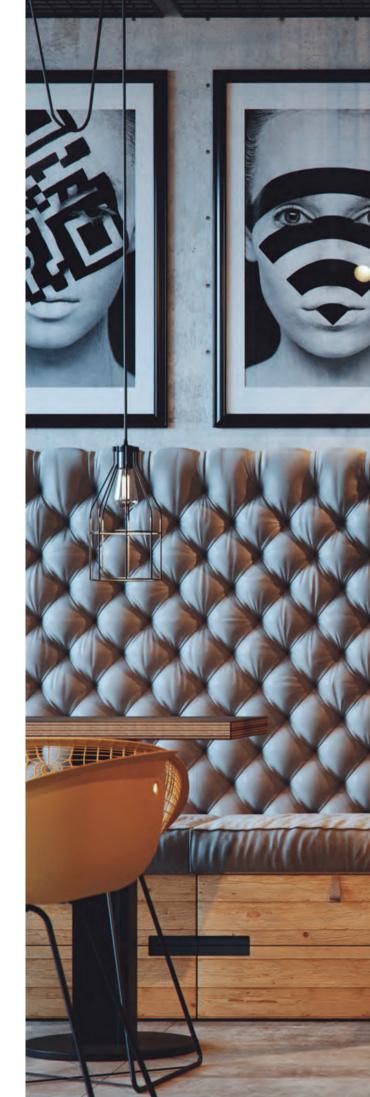

Steel door frames have welded and ground joints. Next they are painted with our Premium polyester paint. Thanks to this process, joint lines are invisible and very durable at the same time.

HIGH DURABILITY

High-precision manufacturing and fi rst-rate materials guarantee long-term quality. Their high resistance to mechanical damages and corrosion make them great, long-lasting products. Steel door frame is a good choice, especially for rooms with increased humidity, e.g. kitchens or bathrooms

HUMIDITY RESISTANCE

Our steel door frames are made out of galvanized steel sheet and additionally secured with passivation layer. Then, a layer of polyester powder paint is applied on the surface. This all together results in increasing corrosion resistance for many years and in protecting frames against water, e.g during fl oor cleaning.

INTERNAL DOORS WITH WOODEN DOOR FRAMES

Table with dimension for internal double doors you can find on: www.porta.com.pl/do-pobrania

In order to obtain dimension So for double leaf doors it is necessary:

- a) for rebated door leaves with PORTA SYSTEM frame: to the So dimension given in Table 1 for single door leaf, add the Ss dimension of the second (rebated) leaf or of the side panel (rebated)
- b) for rebated door leaves with other frames: to the door leaf dimension So given in Table 1 for the single door leaf (rebated) door leaf, add the Ss dimension of the second (rebated) door leaf or side panel, and reduce the resulting value additionally by 10 mm.
- c) for non-rebated leaves: to the So dimension given in Table 1 for the single (non-rebated) door leaf, add the Ss dimension of the second (non-rebated) door leaf or the side panel (non-rebated) door leaf, increased by 16 mm.

HEIGHT, 220' IS AVAILABLE IN CHOSEN COLLECTIONS:

- 4 Elements
- PORTA VECTOR
- PORTA ART DECO
- PORTA DESIRE
- PORTA OSLO
- Nature OSLO
- Nature CLASSIC
- Nature LINE
- Nature VECTOR

NOTES:

- Dimensions tolerance according to PN: to 1 m +=1mm, above 1 m +-2mm.
- Side door panels for rebated door sets are available in Natural veneer in size '40', S₅=444, H₅=2030.
- Door frames are designed to be installed on finished floor level. For steel door frames there is a possibility to order them in lengthen option + 30 mm (to be mounted . under floor level). In this case sizes H_g and Hz are enlarged by 30 mm (level -30). Given dimension refers to internal door leaves, both rebated and sliding
- •
- PORTA SYSTEM integrated with an upper transom. Dimensions H_g, H_g, H_g, +302 mm. Project (BIS and Premium) requires enlarging the wall opening S0 by 30 mm and H0 by 15 mm (dimension tolerance +-10 mm/ +-5 mm) •

Durability levels of PORTA finishes

CHECK THE NUMBER OF STARS NEXT TO EVERY FINISH

You can find six groups in below classification of PORTA finishes. Finishes were grouped considering guality, durability and resistance to external conditions. We hope that this classification will help you to make the best possible choice. You can find the information about durability level next to each product.

★☆☆☆☆ ECONOMIC The most advantageous combination of cost, and quality.	★★☆☆☆☆ STANDARD Basic durability level which provides the possibility of long-term use in household.	★★☆☆☆ STANDARD PLUS Improved STANDARD class with enhanced parame- ters of resistance to abrasion and humidity.		
PREMIUM A perfect combination of design and guaranteed high quality. Indications for use: residential buildings and offices.	★★★★☆ PROFESSIONAL Durability level that combines great practicality and elegance in any place where doors are directly exposed to long-term external factors. Suggested indications for use: hotels, public buildings and offices.	EXTREME High durability level which guarantees door protection from intensive usage. Indications for use - places with heavy foot traffic, where hundreds of people pass daily.

Especially for you, basing on European standards, we have developed a classification of finishes (durability levels). We took into account various external factors which directly affects the durability of the door surface. Durability levels depends on the resistance to the following factors which make an impact on doors and finishes in everyday use.

ABRASION

Unavoidable during any door usage. Every day doors are exposed to lots of abrasions, caused by people walking through and opening doors inappropriately because of their hands occupied with documents or belongings

DETERGENTS

-::

Housekeeping, both at home and in a workplace involves the use of detergents which make an impact

Natural veneer 'Select' - is a specially prepared and selected Natural veneer characterized by high repeatability of the wood grain and colour. Products finished with this type of veneer meet the high quality standards.

Natural veneers: Oak Ash, Walnut and Satin Oak - are characterized by a variety of colorus, graining, etc. Their properties are the result of: Natural environment of trees, climate, habitat conditions. These morphological properties of wood, which are characteristic for a Natural material, distinguish it from synthetic finishes and aren't defective in any way.
